

MICRODERMABRASION

The most clinically advanced and customizable Microdermabrasion on the market. Our Dermasweep Exfoliation Treatment effectively “sweeps” away the signs of aging, sun damage, acne lesions, and dry skin. We then combine an innovative blend of skin specific solutions that is tailored to your individual needs and infuse them into the layers of your skin. This treatment leaves your complexion deeply and precisely exfoliated, soft, smooth and hydrated.

CUSTOMIZED PEELS

Our customized peels are modified to meet your skin care needs and goals. We offer light to medium depth peels in a variety of strengths and ingredients that can easily be adjusted depending on the desired exfoliation. These personalized peels improve skin tone and texture, fine lines and wrinkles, age spots and other discolorations as well as acne.

PHOTOREJUVENATION

Utilizing the most advanced medical intense pulsed light wavelengths, we can precisely treat many of the most common signs of aging and sun damage. Age spots and other stubborn pigmented lesions are lifted from the skin and the redness associated with broken blood vessels and Rosacea fade and disappear with time. While multiple treatments are usually necessary your skin will look rejuvenated and more even toned after one.

PIXEL LASER RESURFACING

A brand new way to reverse the signs of aging, counteract sun damage and smooth acne scars. This fractional ablative laser provides the results of older technologies with fewer side effects and less down time. While results are noticeable after a single treatment, we may recommend a series of treatments to reach your desired goal.

ACCENT FACIAL LIFTING AND TIGHTENING & ACCENT BODY VOLUME REDUCTION AND TIGHTENING

This revolutionary skin tightening regimen uses advanced radio frequency (RF) technology to treat wrinkles non-invasively. With this treatment's effectiveness in tightening loose skin, promoting healthy collagen production and improving body contours, you will see noticeable results faster than with other non-invasive treatments. Your final result will be a smoother and more youthful appearance. A series of 5-6 treatments provides optimal results to any problem area- Jowls, Double Chin, Abdomen and Thighs.

LASER HAIR REDUCTION

Our intense pulsed light hair reduction system utilizes the most sophisticated and revolutionary AFT technology. This specific wavelength of light is not only effective, but we are able to treat the most common hair concerns safely and with minimal discomfort. This is a great solution for unwanted hair on the Face and Body.

ACNE BLUE LIGHT

Blue light treatments are an effective and safe solution for certain types of acne. This particular spectrum of broadband light specifically targets the acne causing bacteria. When treatments are performed twice a week for four weeks the level of clearing that occurs makes this device a gold standard in the healing of acne.

TEEN TREATMENTS

Dealing with blemished skin at any age can be hard enough, but the effects of the acne can stay with us long after it resolves. Customizable teen treatments offer a variety of solutions depending on the type of acne that is occurring. We offer these treatments in a safe and reassuring environment for all ages. Most treatments are only fifty dollars for 12-18 year olds.

INJECTABLES

Injectable products provide effective treatment, with little recovery time, for facial lines, wrinkles and depressions. The result of these minimally invasive treatments--a "boost"--that allows you to look and feel your best. We offer facial rejuvenation with injectable treatments. Botox and/or Dysport relax specific muscle groups, and in turn, provide lift and reduction of lines around the brow, eyes and mouth. Dermal fillers provide relief and /or recovery to the depressions, or what is referred to as the "hills and valley's" of the face. Radiesse and Juvederm Ultra are the two primary materials available to treat and alleviate these areas of facial depression and in turn, restore a more youthful, refreshed appearance to the aging face. All injectable treatments are provided by our Aesthetic Nurse Injector.
